About the FDP

Objective:

Web technologies are infrastructural building blocks of any effective computer network. Communication on a computer could never be as effective as they are without the plethora of Web technologies in existence. The FDP has an NBA oriented approach.

FDP Outcomes:

- Adapt HTML and CSS syntax and semantics to build web pages.
- Construct and visually format tables and forms using HTML and CSS
- Develop Client-Side Scripts using JavaScript and Server-Side Scripts using PHP to generate and display the contents dynamically.
- Appraise the principles of object oriented development using PHP
- Inspect JavaScript frameworks like jQuery and Backbone which facilitates developer to focus on core features.
- CO PO Mapping(as per NBA guidelines)
- Content Beyond Syllabus

Who Can Attend?:

Teaching faculty who will be handling the subject of Web Technology & it's Applications (15CS71) and Web Technology Lab with Mini Project(15CSL77). It also helps other faculty to keep in touch with the latest developments in the domain of Web Technology.
